Udbhav Shrinet

+91 9667070428 | udbhav.singh.shrinet@gmail.com | linkedin.com/in/udbhav-shrinet | github/udbhav-shrinet

Skills

Languages: Python, Appscript, HTML, CSS, SQL, Git, SPSS, R, Stata, R

Technologies & Tools: Cloud Computing, PowerBi, Tableau, Looker Studio, Excel, Photoshop, Figma, Framer, Canva.

Work Experience

ABP Network May 2025 - Present

Data Analyst

- Competitor Intelligence Tool – Built a sitemap extractor to track and visualize article publishing patterns across rival news sites, helping editorial teams strategize better
- Comscore Automation – Automated data cleaning workflows, cutting processing time and enabling timely insights for audience reporting
- Demographic & Viewer Analysis – Analyzed Comscore data to uncover age, gender, and location-based audience trends
- SEO Optimization with Blended Data – Merged Google Trends and Search Console data to identify high-performing topics and improve organic reach

ABP Network May 2024 – July 2024

Data Analyst Intern

- Automated Data Cleaning with Macros – Reduced manual errors and improved dataset consistency using Excel macros
- Interactive Dashboards in Looker Studio – Built visual dashboards to monitor audience metrics and market trends
- Real-time API Integration (Python + JS) – Automated data pipelines from REST APIs for continuous data availability
- Serverless Workflow Automation (GCP) – Used Cloud Run, BigQuery, Scheduler & Pub/Sub to orchestrate backend tasks
- Data Integrity Scripting – Added robust error-handling and logging in Python & JavaScript to ensure clean, reliable data

Max Life Insurance May 2022 - July 2019

Research Intern

- Generated actionable insights, streamlined reporting processes, and conducted training to promote data-driven decision-making
- Analyzed large-scale claims data to uncover trends, aiding in strategic planning and risk mitigation

Education

Christ University Aug 2022 - Jun 2025

B.E. in Computer Science and Engineering ***CGPA: 7.55/10***

Relevant Coursework: Econometrics, Statistics, Time Series Analysis, Regression Modeling, Hypothesis Testing, Game Theory, Monetary & Fiscal Policy, Data Visualization, Financial Accounting, Market Structures, Consumer Behaviour, Python for Data Analysis

Projects

- YouTube Live Data Analytics: Built a cloud-based system using Python, Cloud Functions, and BigQuery to process and analyze YouTube live video metrics for performance insights.
- Instagram Live Analytics: Developed a pipeline in Python to fetch and analyze Instagram metrics. Used clustering techniques to segment audience behavior and content types.
- World Bank Data Extractor: Used the World Bank API to pull macroeconomic indicators directly into Google Sheets for automated research and dashboarding.
- Spotify Data Analysis: Fetched Spotify chart data using API and visualized trends across countries through a dashboard, analyzing artist and genre-level performance.
- Sitemap Extractor & Visualization: Built a Python tool to extract sitemap data from competitor news websites. Parsed and visualized article publishing trends to support content and SEO strategy.

Awards and Certificates

- Completed the 'Introduction to Psychology' course from Swayam.
- Completed the Statistics course from Stanford University on Coursera.
- Completed Google Data Science course on Coursera, specializing in data analysis.
- Top 10: Part of Cryptic Hunt at VIT Chennai, honing problem-solving and teamwork skills.
- Junior Diploma in Piano: demonstrating proficiency in music theory and performance.
